About This Game

"Don't you remember me? After all we've been through..."

What do you want to be when you grow up? Paul thought his life would be set after college, but at 22 he's toiling away in a job he doesn't like and coming home to an empty apartment every night. He doesn't know who he is, where he's going, or how he fits into his world.

But then on one dark and stormy night, a mysterious woman appears to him, and everything changes...

The Beard in the Mirror is a throwback to when adventure games came in giant cardboard boxes and if you didn't have the hintbook, that was it; you were stuck on that puzzle for the rest of your life. It's a labor of love from a husband-and-wife team from two different worlds (she's a Sierra fangirl, and he's a LucasArts diehard) who have been working on it together since before they even started dating.

the beard in the mirror walkthrough. the beard in the mirror

The exquisite sequel to one of my favourite puzzle platformers. Highly recommend!. Totally overpriced. You either need to pay money or you have to play 9482739482734928479723 hours to get anything. The cheekiest system I've ever seen. It is such an amazing game... If you want to get a little bit frustrated (only a tiny bit), and want to laugh a lot at the game "mechanics", you should definitely buy it.

If you're tight on budget, you should probably spend your money elsewhere. very stupid little boring game.. For a \$2.49 purchase price it wasn't too bad. After clearing the stages I didn't have any desire to go back and replay, perhaps if I had the option of running vs AI bikes or online people at the same time (onscreen) it'd have been a different scenario but as it stands, it was a purchase I could have gone without.

The gameplay is tight but there are moments of "UGH I WILL DESTROY YOU." There are some physics exaggeration but that is to be expected for a title like this to work and be successful. While they are exaggerated they do make sense. The audio is quite repetitive and the music, oh the music... I'd have preferred being able to load my own music instead of listening to the garbage. I turned it off.

In the end I can't recommend this game because there are newer editions out that *should* feature the onscreen multiplayer I mentioned.. great unique puzzle game

deeper than it appears. Too much difficulty trying to get it to play. Never could. Would never recommend this game.. This game was sent to me by the developer) I found this to be a fun yet short experience Difficult yet rewarding and fun and excellent for speed running. it's very much worth it's 2.99 price tag. Feel free to watch a video I created on it <https://www.youtube.com/watch?v=bP3pnt5vuUQ>. Nice little game I bought for 1 Euro in a heavy Discount. So to be honest it feels like it may be worth 1 Euro, it's fun for a few minutes for sure. But seeing the normal price of nearly 11 Euros just makes me sad. This should always be around that 1 Euro!

Devs, please adjust that price!

Besides the pricing it's a small Wave Shooter. You shoot tomatoes at Barrels coming towards you. Nothing special. Feels weird sometimes. Graphically nothing spectacular. Have seen better Wave Shooters of similar style with more variety in Weaponry, Levels, Enemies etc. They may be worth 5-10 Euros, but this is not.. Third in the series, you, the Chosen One are called to the Lost Lands once more. This time to figure out how a harpy broke free of her petrified form. Oh, and you are also told to not touch the gold as it is cursed\u2026 maybe the two are related?

An exciting plot, fun HO scenes, and challenging minigames await. Get in the bundle.

This is a fantastic MS-DOS Classic from my Childhood days!

If Duke Nukem has a twin separated at birth, it's got to be Halloween Harry! But don't let his name fool you, he's no Pumpkin Head. In Fact, the Earth is in Big Trouble & on the verge of a hostile takeover by aliens intent on turning humans into mindless slave zombies, who can be used in their conquest of the universe.

Harry's called into action to Space Station Liberty, Standing Tall and given orders by Diane to penetrate the alien ship which has burrowed itself underneath New York City (Halloween Harry 1.1 Version) or Attaching itself to a Skyscraper Antenna (Alien Carnage Version).

With 4 Different Missions to play & Arsenal of 5 Different Weapons (Flamethrower, Photon Blaster, Thermal Grenades, Heat Seeking Missiles, Micro-Nukes and The Awesome Omega Smart Bomb), you'll be able to save the planet again and again!

In addition, I've found a way to switch between Alien Carnage & Halloween Harry 1.1 by means of a Custom Installation. See my Alien Carnage/Halloween Harry Codes & Secrets Guide for more Details.

On 1-1-2016, the 3D Realms Anthology has been discontinued. We'll miss you, Apogee Software!. Good game, nice graphic, cool story, gloomy forest, funny achievements.. 3 great levels, 1 solid AR with attachments, and various goodies.. Well it's not that bad ! I thought seeing the comments that is was unplayable but with some music it's really fun and for 5\$, well it's not like it was 20\$, it is worth this little price because it is quite well done.

There are still some bugs, some sound to update (the ride for example) and sometimes the crash makes no sound but, it is still great because it is no real serious matter and does not happen frequently.

Also, a pedal support would be great, cause with the trigger it's kinda hard to play without \u2665\u2665\u2665\u2665ing up the tempo, and also with that we could have double bass support.

As a 6 years drummer, I recommend it because yeah it has nothing to do with real drumming, but for a little game that costs less than a cigarette pack, and that is a lot of fun, it is worth it.. Worse. Does not connect to servers. Laggy game to start with. Didn't even get to see the field.
